NEOSTRIKE

The Fast Track–Native Integration Platform

For Casino & Sports-Book · Live in 48 Hours

The 6-Week Development Gap

⚠ The Challenge

Technical founders waste 6-8 weeks building game provider adapters, wallet UIs, game lobbies, and payment flows from scratch.

- Dev cycle: **6-8 Weeks**
- Sunk costs: **€50K-€100K**
- **FT Sync:** **8-12 Weeks** dedicated
- Risk: Legacy "afterthought" CRM sync

🚫 The Market Gap

Aggregators lock you into their contracts. Generic tools can't handle real-time gaming requirements.

- Rigid White-Label stacks with limited flexibility
- Slow real-time data sync affecting player experience
- No native Fast Track support requiring custom builds

> ⓘ Industry data shows integration complexity adds 40-60% buffer to vendor timelines

The 48-Hour Advantage
Integration Orchestrator for Fast Track casinos

NeoStrike is the Integration Orchestrator for Fast Track casinos and sports–book.

Pre-Built Adapters

Top 3 game providers (Evolution, Pragmatic, NetEnt) + payment orchestration (Adyen, Stripe). Game Catalog API included.

BYOC Model

Bring Your Own Contracts. Maintain direct relationships with providers. Keep your commercial leverage.

Auto Compliance

Tools-powered compliance and responsible gaming built-in. Automated regulatory reporting.

Fast Track CRM Integration

Async Event Streaming

Latency **< 10ms** to publish all events. Instant sync for every bet, win, and login.

- ✓ RabbitMQ-powered
- ✓ Event-driven architecture
- ✓ Guaranteed delivery (durable queues)
- ✓ No impact on API performance (async)

9 Core Event Types

From Registration to KYC. Deduplicated and reliable event delivery to Fast Track.

- ✓ Complete event coverage
- ✓ Automatic deduplication

No-Code Configuration

Connect CRM, test webhooks, and map event logs via the Tenant Portal UI without writing code.

- ✓ Visual workflow builder
- ✓ Instant deployment

ⓘ NeoStrike publishes events to RabbitMQ in <10ms — Fast Track consumes asynchronously with guaranteed delivery

Maximizing Payment Approval

Adyen (Raw)	91.5%
Stripe (Raw)	90.8%
NeoStrike Orchestrated	99.2%

🌐

Geography-Based

Smart routing by region

👑

VIP Status

Priority processing

📈

Historical Patterns

ML-optimized routing

💡 Payment orchestration can boost approval rates by up to **15%** and reduce declines below **15%**

Pure Serverless Architecture

Single Platform	Vercel
Scales to Zero	Pay Per Use
Auto-Scaling	10-10K Users

Edge Functions
Global edge network

RabbitMQ
Async messaging

Cost Efficient
€54-79/month

Fully serverless architecture with no containers or WebSocket servers—everything scales automatically

Premier Game Provider Adapters
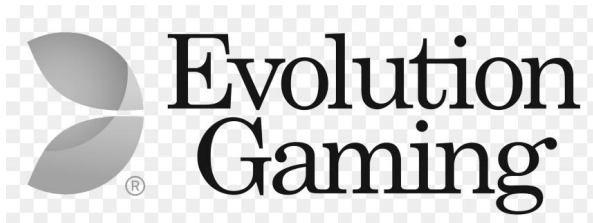

Evolution

- ✓ Seamless Wallet
- ✓ Live Casino & RNG
- ✓ 2-min Setup

Pragmatic Play

- ✓ 250+ Slots & Bingo
- ✓ Live Games
- ✓ Async Event Streaming

NetEnt

- ✓ Casino API
- ✓ Branded Games
- ✓ High-Retention Slots

➕ More providers coming Q4 2026: **Play'n GO, Microgaming, Red Tiger**

NeoStrike Starter Kit

Three tools. One command. Production-ready in days.

Game Catalog API
● **Single Endpoint**

Single endpoint for **847+ games** across all providers. Search, filter, launch in one API call.

- **One-command scaffold**
- **MIT licensed**, you own the code

Reference Frontend
● **React + Tailwind**

React + Tailwind template. Fork, brand, deploy. Pre-built game lobby, wallet UI, auth flows, and RG modals wired to NeoStrike APIs.

- **Game lobby + wallet + auth**
- **Duty of Care alerts** built-in
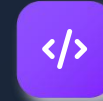

@neostrike/sdk
● **React Hooks**

React hooks that handle **balance, games, payments and alerts**. useBalance(), useGames(), usePayments() — 2 lines to wire any component.

- **TypeScript support**
- **Published to npm**

Without NeoStrike Starter Kit
6-8 weeks of boilerplate

Time Saved
75%

Auto Duty of Care & Compliance

Behavioral Pattern	Detection Logic	Auto-Intervention
Chasing Losses	5+ consecutive deposits after losses	Reality Check + Cooling-off
Velocity Spike	Bet frequency > 3x baseline	Session Time Alert
Rapid Escalation	Bet size 10x in 30 minutes	Mandatory 5-min Break
Prolonged Session	Continuous play > 90 minutes	Reality Check Notification

🛡 Rule-based detection with instant intervention — regulators require explainability, not black-box ML

🤖 2026 regulations mandate algorithm-based risk monitoring in Brazil, Germany, Italy

Hands-Off Regulatory Compliance

UKGC Monthly Returns

Automatically generated on the 1st of every month. Ready for download or SFTP delivery.

✓ MRR Compliance

MGA Player Protection

Quarterly reports covering player protection and RG metrics auto-compiled via API.

↻ API Integration

Curaçao Compliance

Annual compliance reports generated every Jan 31st with full fair-gaming RNG verification.

⇄ RNG Verified

7-Year Audit Trail

Full event-level data retention. On-demand exports in CSV/JSON for any audit request.

🗄 Full Retention

✏ Compliance automation reduces administrative burden by **85%** while ensuring full regulatory adherence

Mission-Critical Performance

99.8%
API Uptime
Guaranteed SLA

100ms
API Response
for player balance updates via stateless responses

<10ms
RabbitMQ Publish
RabbitMQ Publish

End-to-End Latency Target

Ladapter + Lpublish < 100ms

Auto-scaling infrastructure

Multi-region deployment

24/7 health monitoring

Enterprise Security & BYOC Model

The BYOC Moat

NeoStrike is a Technical Service Provider (TSP). We never touch player data or wallet custody—you maintain full control and compliance

✓ **No Game Aggregator Markups**
Keep your margins intact

✓ **Player Data Ownership**
You own player data, we process events

✓ **Merchant of Record Status**
Full commercial ownership

Military-Grade Security

AES-256 Encryption
All credentials secured

TLS 1.3
In-transit protection

Isolated Vaults
Credentials never co-mingled

Certifications
ISO 27001, PCI DSS, SOC 2

Development Roadmap 2026

Q1 — Core Build

Weeks 1–12: RabbitMQ, Provider Adapters (3), Payments (2), Fast Track

Foundation

Q2 — Launch

Weeks 13–18: Game Catalog API, Reference Frontend (React), SDK

Go-Live

Q3 — Beta & Pilots

Onboard 3 pilot operators, gather feedback, performance hardening

Innovation

Q4 — Scale

Post-Launch: More Providers, ML Upgrade, Certifications

Expansion

48-Hour Launch
2-week launch using reference frontend + your branding

Global Ready
Multi-jurisdiction support

Continuous Updates
Monthly feature releases
